PRODUCT OVERVIEW & CAPABILITIES SPECIFICATION

KUMBHAKARAN (SLOON)

"Too lazy to call. Too smart to wait."

On-Demand Multi-Salon Discovery & Live Walk-In Queue Network

Comprehensive Functional Guide

1. What is the Project?

Kumbhakaran (SLOON) is an on-demand multi-salon discovery and walk-in transparency platform. It connects everyday customers with neighbourhood barbershops, unisex studios, and premium salons by answering the single most important question before stepping out: *"How crowded is the salon right now, and how long will I have to wait?"*

Traditional booking platforms fail salons because scheduled haircut appointments frequently run over time, forcing clients to wait anyway. SLOON fixes this by prioritizing **authentic walk-in transparency**: customers can see the real-time queue length, estimate their wait, view transparent pricing, take a digital token, and walk in with zero guesswork.

🚀 The Core Problem Solved

Eliminates awkward phone calls, blind visits to packed salons, hidden service prices, and wasted hours waiting on salon couches.

💡 The Solution

A synced live queue counter, real-time digital walk-in tokens, interactive in-app pinned maps, transparent service menus, and multi-criteria reviews.

2. How the Walk-In Flow Works

1. **Discover**
   Customer browses salons by location, gender, services, and live queue status.
2. **Check Queue**
   View exact number of people waiting, estimated wait in minutes, and barber status.
3. **Get Token**
   Join live queue online or at desk to receive a digital walk-in token (#01, #02).
4. **Walk In**
   Navigate via in-app map and arrive seamlessly as your chair becomes available.

3. User Roles & What You Can Do

1. Everyday Customers (Clients)

CUSTOMER PORTAL

For anyone looking for a haircut, beard trim, styling, facial, or grooming session

- **Live Walk-In Queue Status:** View how many people are currently sitting in the salon and get a calculated wait time (e.g. *"2 in Queue · ~25m wait"*) before leaving home.
- **Digital Walk-In Token:** Join the live queue with one click. Get an instant token number (e.g. `#03`) and track your position live on your phone.
- **Smart Queue Assist:** Alerts you when your turn is approaching based on your distance from the salon.
- **Pinned In-App Map & Road Navigation:** Click the location pin on any salon card to open an interactive map right on the website with turn-by-turn road travel and off-road walking guides.
- **Browse & Filter:** Switch between `Men` and `Women` salons; filter by categories like `Hair`, `Beard`, `Combos`, `Spa`, `Facial`, and `Color`.
- **Transparent Service Catalogue:** Browse full price lists, service descriptions, durations, and popular service badges with no hidden charges.
- **Showcase & Looping Studio Video:** Preview the salon's ambiance with live loop video tours, interior photos, and previous styling work.
- **Stylist Rosters:** See who will cut your hair—view master barbers, their years of experience, specialties, and chair availability.
- **Compare Salons:** Select up to 4 salons to compare wait times, prices, and ratings side-by-side.
- **Granular 5-Criteria Reviews:** Rate your visit across 5 specific dimensions: Haircut Quality, Staff Behaviour, Cleanliness, Pricing, and Overall Experience.
- **Save Favourites:** Bookmark your go-to neighbourhood studios for instant one-tap access.
- **Crowd Reporting:** Community feedback button allowing customers at the shop to confirm or report current crowd levels.

2. Salon Owners & Partners

For salon proprietors and managers running daily shop operations

PARTNER PORTAL

- **Live Walk-In Counter Control:** Instant `+1` and `-1` buttons to log walk-in customers entering or leaving the salon, syncing live with all nearby customers.
- **Queue & Token Dashboard:** See the active list of waiting clients, call the next token, seat them at a specific chair, and mark services as completed.
- **Pause & Resume Queue:** Pause walk-ins during rush hours, power cuts, or lunch breaks, or mark the salon as closed.
- **Staff Roster Management:** Add and manage your barbers and stylists. Mark their live chair status (`Available` `In Service` `On Break` `Off Duty`).
- **Service Menu & Pricing Management:** Create services with names, categories, custom pricing, and duration in minutes.
- **Salon Media Showcase:** Upload cover photos, interior studio pictures, portfolio work photos, and continuous loop video URLs.
- **Interactive Location Pinning:** Drag and drop your exact storefront location on the map during registration so customers navigate directly to your shop.
- **Business Analytics & Daily Revenue:** View real-time tracking of today's customers served, today's gross revenue, and monthly earnings.
- **Multilingual Support:** Choose your preferred regional language on login—portal supports `Hindi` `Marathi` `Gujarati` `Bengali` `Tamil` `Telugu` `Kannada` `Malayalam` `Punjabi` .
- **Customer Review Management:** Read customer ratings across the 5 criteria and post official owner responses.

3. Stylists & Barbers

For individual grooming artisans working on the salon floor

BARBER STATION

- **Chair Availability:** Set personal status when ready for the next customer or taking a break.
- **Assigned Token View:** See upcoming customers assigned to their specific chair.
- **Service Session Tracking:** Track service timers and log completed haircuts.

4. Platform Administrators

For platform operations, quality verification, and city network management

ADMIN CONSOLE

- **Salon Verification:** Review newly registered salons, check license/location details, and award the *"Verified Salon"* badge.
- **Network Governance:** Activate, suspend, or manage salon listings across different cities and localities.
- **Content Moderation:** Inspect flagged reviews or abusive comments to maintain community trust.
- **Network Analytics:** View city-wide statistics, total active queues, customers served, and platform health.
- **Audit Trail:** Full activity logs recording all administrative decisions for accountability.

4. Key Differentiators

📍 Smart Hybrid Navigation

Unlike generic maps that drop you on a main road, SLOON guides you along actual streets plus dashed off-road walking connectors right to the salon's entrance door.

⭐ 5-Dimensional Reviews

Feedback is broken down into Haircut Quality, Barber Behaviour, Cleanliness, Pricing, and Experience so customers know exactly what to expect.

⚡ Zero Login Friction

Customers can browse, compare, and check live queues immediately without mandatory signups or invasive phone numbers.

🌐 Native Indian Languages

Salon owners can operate their daily queue and staff dashboard in their comfortable mother tongue with full multilingual translation.
